## **Explanation**

By the Decision of the Exchange Managing Director number 01/1 no. 3199/10 made at 11:00 am on 9.4.2010, share trading on Listing A /Prime Market/ for the individual trading session held on 9.4.2010 was temporarily suspended. The temporary suspension was introduced due to circumstances preventing a proper functioning of the Exchange information system – BelexFIX in the segment “Prime market – shares” discovered after the end of the opening phase and trading at opening, at the individual trading session for shares on Listing A – Prime market on 9. April 2010, and the need to undertake measures to resume undisturbed functioning of the Exchange information system – BelexFIX on the said segment. As the causes leading to the temporary trading suspension have ceased to exist and the conditions for undisturbed functioning of the Exchange information system BelexFIX have been met, the decision was made as stated in the above text.
